Hunain's Portfolio

---

## SUMMARY

Passionate Frontend Developer with hands-on experience in JavaScript, TypeScript, React.js, Next.js, angular.js and Tailwind. Started my journey with a basic HTML/CSS course and quickly leveled up through real-world implementation during my internship at Kaj Consultancy. I worked on projects like job portals and company profile websites, which helped me grow fast and land a permanent role in just two months. I love exploring new tools and technologies, and I've also worked with MySQL, Firebase, GitHub, and WordPress. I believe in learning by doing and constantly pushing my skills forward.
